STYLE AND FUNCTIONALITY

INTEGRATED MINI BLINDS

ON SELECT SLIDING PATIO DOORS

EVERYDAY BEAUTY AND CONVENIENCE

Reverse sliding patio doors now offer the added option of an integrated mini blind sealed in the insulated glass unit. This sleek design innovation keeps the blind free from dust and damage, while allowing easy fingertip control to lift and tilt the blind with a single operator.

BEST-IN-CLASS DESIGN TECHNOLOGY

- The blind remains virtually dust-free in a sealed insulating glass unit
- A convenient, single operator makes it easy to lift and tilt the blind for sunlight and privacy control (A)
- Self-leveling bottom rail allows the blind to be re-leveled if it becomes unbalanced (B)
- Enhanced safety – an integrated, cordless blind removes the risk of children or pets getting entangled in the cords

EXPERTLY CRAFTED FOR ENDURING QUALITY

- A single cord-winding shaft provides improved “stack,” which prevents the blind from coming in contact with the glass surface (C)
- No-slip gear belt for smooth lift and tilt operation of the blind (D)
- Rigorously tested at 290,000+ cycles, far exceeding the industry standard of 3,500 cycles
- Withstands doors opening and closing
- Backed by an **industry-leading 20-year limited warranty** – further assurance of premium quality and value; see printed warranty for details

ENERGY-EFFICIENT OPTIONS

- ENERGY STAR® qualified options available
- **BarrierXP® ThermD LT** – Double-paned insulated glass unit with one pane of Low-E glass and stainless steel Intercept® Spacer
- **BarrierXP ThermD LT SF** – Double-paned insulated glass unit with two panes of Low-E glass (surface 2 and 4) and stainless steel Intercept Spacer

Integrated mini blinds will feature a white blind.
